NECTRE OUTDOOR PIZZA OVEN

NECTRE *Outdoor Pizza Oven*

What better way to entertain guests, than to prepare mouth watering pizzas, tender roasts or crusty wood fired bread in the new Nectre Outdoor Pizza Oven. The Nectre Pizza Oven features a large oven with a firebrick base, allowing some of the smoke from the fire to enter the oven, giving a taste to food only wood can provide. The firebox is large enough to warm your outdoor area and provide an ambience only a wood fire can give to those cool evenings. Constructed of stainless and mild steel, the Nectre Pizza Oven is designed to last. The front is made from 5mm plate stainless steel and will burnish over time, which adds to the character of the oven. Installed on a bench top or with the optional galvanised stand, the Nectre Pizza Oven is a great addition to your outdoor entertaining area!

Dimensions
